Connector Excellence®

Positronic Provides Complete Capability

Mission Statement

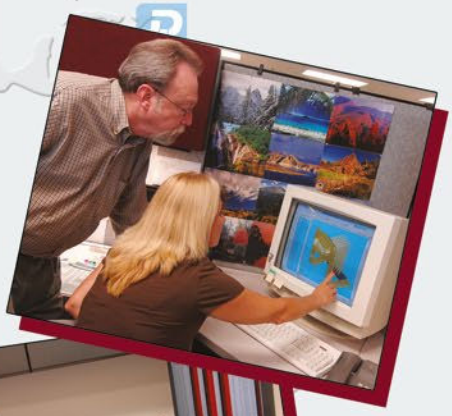
"To utilize product flexibility and application assistance to present quality interconnect solutions which represent value to customers worldwide."

Experience

- Founded in **1966**
- **Involvement** in the development of international connector specifications through EIA®, IEC and ISO as well as PICMG®.
- Introduction of new and **unique connector products** to the electronics industry.
- Patent holder for many **unique connector features and manufacturing techniques.**
- **Vertically integrated** manufacturing – raw materials to finished connectors.

Technology

- **Expertise** with solid machined contacts provides a variety of high reliability connectors including high current density power connectors.
- Quality Assurance lab is **capable of testing** to IEC, EIA, UL, CUL, military and customer-specified requirements.
- **In-house design and development** of connectors based on market need or individual customer requirements.
- **Internal manufacturing capabilities** include automatic precision contact machining, injection molding, stamping, plating operations and connector assembly.
- **Manufacturing locations** in southwest Missouri, U.S.A. (headquarters); Puerto Rico, France, China, Singapore, and India. Total square footage: 407,441.



Support

- **Quality Systems:** Select locations qualified to ISO 9001, ISO 14001, AS9100, MIL-STD-790 and customer "dock to stock" programs. Applicable products qualified to MIL-DTL-24308, SAE AS39029, DSCC 85039, MIL-DTL-28748, Space D32, GSFC S-311-P-4 and GSFC S-311-P-10.
- Compliance to a variety of international and customer specific **environmental requirements.**
- Large **in-house inventory** of finished connectors. Customer specific **stocking programs.**
- Factory direct **technical sales support** in major cities worldwide.
- **One-on-one customer support** from worldwide factory locations.
- World class **web site**.
- **Value-added solutions** and willingness to **develop custom products** with reasonable price and delivery.

Regional Headquarters

Springfield, MO

Auch, France

Singapore

Products described within this catalog may be protected by one or more of the following US patents:

#4,900,261 #5,255,580 #5,329,697
#6,260,268 #6,835,079 #7,115,002

Patented in Canada, 1992 Other Patents Pending

Positronic Industries' **FEDERAL SUPPLY CODE** (Cage Code) FOR MANUFACTURERS is **28198**

Unless otherwise specified, dimensional tolerances are:

1) ±0.001 inches [0.03 mm] for male contact mating diameters.
2) ±0.003 inches [0.08 mm] for contact termination diameters.
3) ±0.005 inches [0.13 mm] for all other diameters.
4) ±0.015 inches [0.38 mm] for all other dimensions.

POSITRONIC® IS AN ITAR REGISTERED COMPANY

CONNECTOR DESCRIPTIONS

WIN-D STANDARD DENSITY SEALED D-SUBMINIATURE, IMPROVED UNIBODY DESIGN

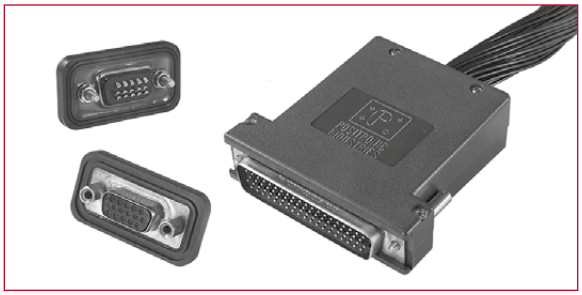
The WD Unibody design provides a one piece connector body providing superior sealing performance. Solder cup, straight and right angle (90º) printed board mount terminations. Five connector variants, 9-50 contacts. Size 20 contacts, professional level performance, IP67.

WIN-DD HIGH DENSITY SEALED D-SUBMINIATURE, IMPROVED UNIBODY DESIGN

The WDD Unibody design provides a one piece connector body providing superior sealing performance. Solder cup, straight and right angle (90º) printed board mount terminations. Three connector variants, 15, 26 and 44 contacts, with more variants being tooled. Size 22 contacts, professional level performance, IP67.

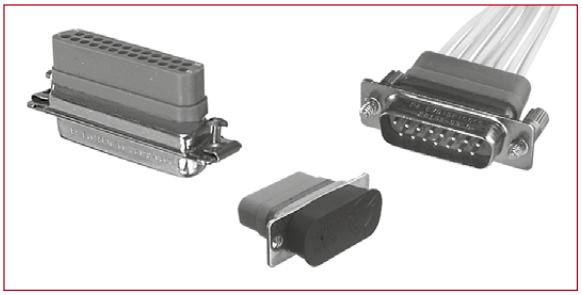
WIN-D STANDARD DENSITY SEALED D-SUBMINIATURE, LEGACY DESIGN

The WD legacy design uses high quality material and manufacturing techniques to provide sealing. Solder cup, straight and right angle (90º) printed board mount terminations. Two connector variants: 25 (male) and 50 (male) contacts. All other standard density connector variants are supplied as Unibody, see description above. Size 20 contacts, professional level performance, IP67.



WIN-DD HIGH DENSITY SEALED D-SUBMINIATURE, LEGACY DESIGN

The WDD legacy design uses high quality material and manufacturing techniques to provide sealing. Solder cup, straight and right angle (90º) printed board mount terminations. Three connector variants: 44 (male), 62 and 78 contacts. All other high density connector variants are supplied as Unibody, see description above. Size 22 contacts, professional level performance, IP67.



ENVIRO-D, STANDARD DENSITY SEALED, CABLE CONNECTOR, REMOVABLE CRIMP CONTACTS, D-SUBMINIATURE

The EVD series utilizes rear connector grommets to provide a sealed connector for use with removable crimp contacts. Five connector variants, 9 through 50. Size 20 contacts; standard and thermocouple crimp contacts. Immersion per MIL-STD 810. Performance conforms to IP67, and applicable requirements of MIL-DTL-24308 and SAE AS39029.

INGRESS PROTECTION CONNECTION SYSTEMS

Electronic equipment is frequently used for outdoor or other applications requiring environmental protection. To answer industry's demand for affordable connection systems compatible with environmental protection to IEC 60529 and NEMA 250-1991 performance requirements for electrical enclosures, Positronic has introduced three dust and water ingress protection connection systems.

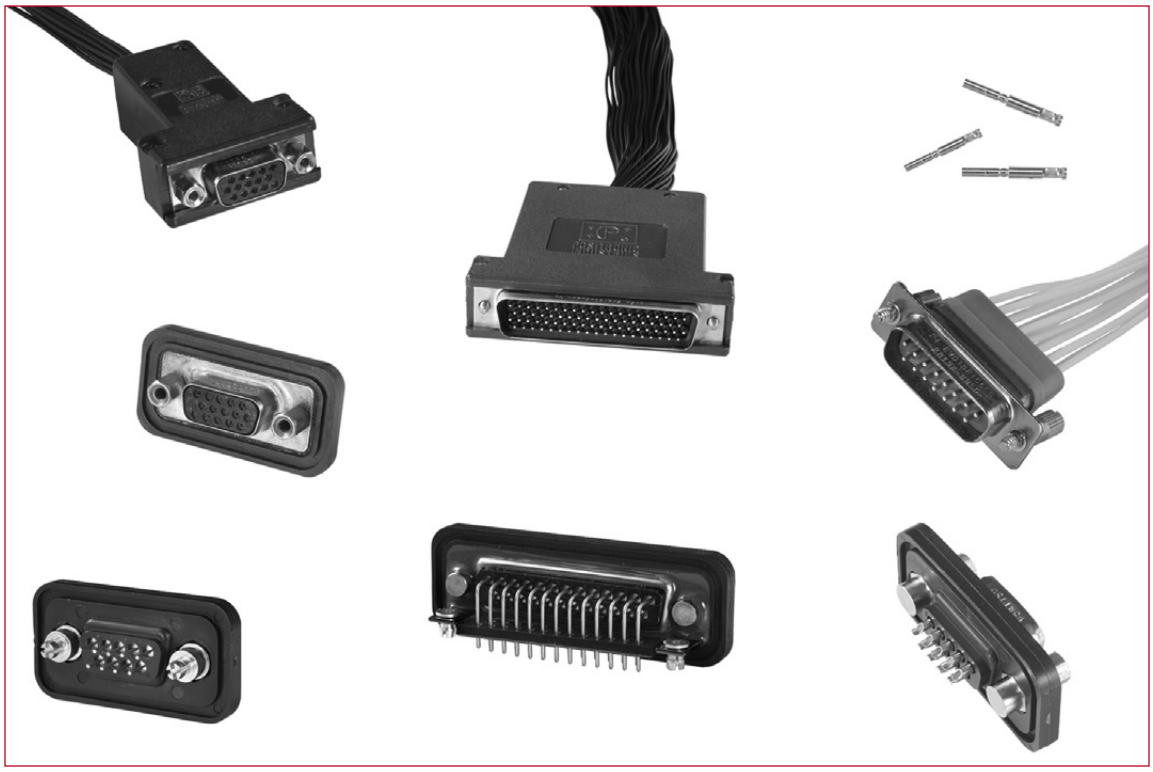
SYSTEM 1 is an enclosure mounted connector assembly. The connection system is designed for periodic electrical operation after being exposed to a variety of environmental conditions.

SYSTEM 2 is an enclosure mounted connector assembly, which is coupled to a compatible free cable connector. The connection system is designed for continuous electrical operation while being subjected to varying environmental conditions.

SYSTEM 3 is a cable to cable connection system designed for continuous electrical operation while subjected to varying environmental conditions.

An explanation of the dust and water ingress protection requirements as defined by IEC 60529 Degrees of Protection Provided by Enclosures, and NEMA 250-1991 Enclosures for Electrical Equipment, may be found in the Appendix section of this catalog. *(See section beginning on page 49)*

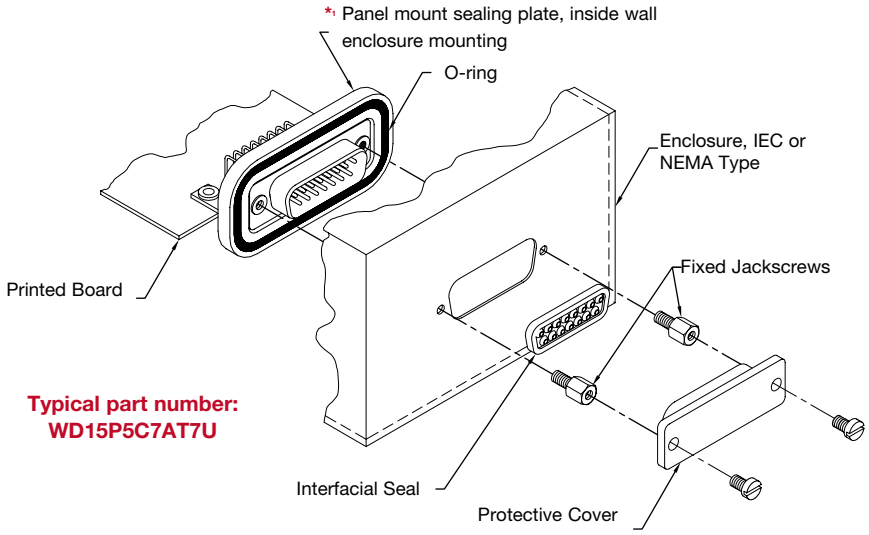
It is recommended that readers familiarize themselves with the technical information and ingress protection rating systems contained in the Appendix so that a better understanding of dust and water ingress protection connection systems can be achieved.



CONNECTION SYSTEM 1

FIXED ENCLOSURE MOUNTED CONNECTOR

Provides ingress protection in an unmated condition.



Typical part number:
WD15P5C7AT7U

This type of ingress protection can be achieved by selecting:

WD Series (page 13)

OR

WDD Series (page 18)

Note:

*1 Outside enclosure wall panel mount sealing plate also available. See Unique Features section, page 46.

SYSTEM 1

System 1 consists of an input/output connector mechanically mounted and sealed to an enclosure. The connector and enclosure together provide a degree of protection from dust and moisture in accordance with IEC or NEMA ingress protection requirements. The enclosure and connector may be exposed to dust, splashing water, rain, or limited water immersion during its use.

"Corrosion Protection" option is standard. When **"Corrosion Resistance"** is a requirement, the connector is equipped with stainless steel shells and jackscrews, and contacts plated 0.000030 inch [0.76 µ] gold over nickel.

CONNECTOR/ENCLOSURE ENVIRONMENTAL RATINGS

IEC 60529 Classification
Designations Rated to IP67 Degree of Protection
(See Appendix for detail)

IP67, "Corrosion Protected"
Dust tight and limited effects of water immersion, 0.5 meters for 30 minutes. Corrosion protected with zinc plated shells and jackscrews. Contacts plated gold flash over nickel.

IP67, "Corrosion Resistance"
Dust tight and limited effects of water immersion 0.5 meters for 30 minutes. Corrosion resistant with stainless steel shells and jackscrews. Contacts plated 0.000030 inch [0.76 µ] gold over nickel.

NEMA Enclosure Types
Approximate Equivalents of IP67 Degree of Protection
(See Appendix page 49 for details)

NEMA Types 3, 3R, 4 and 6

NEMA Type 4X

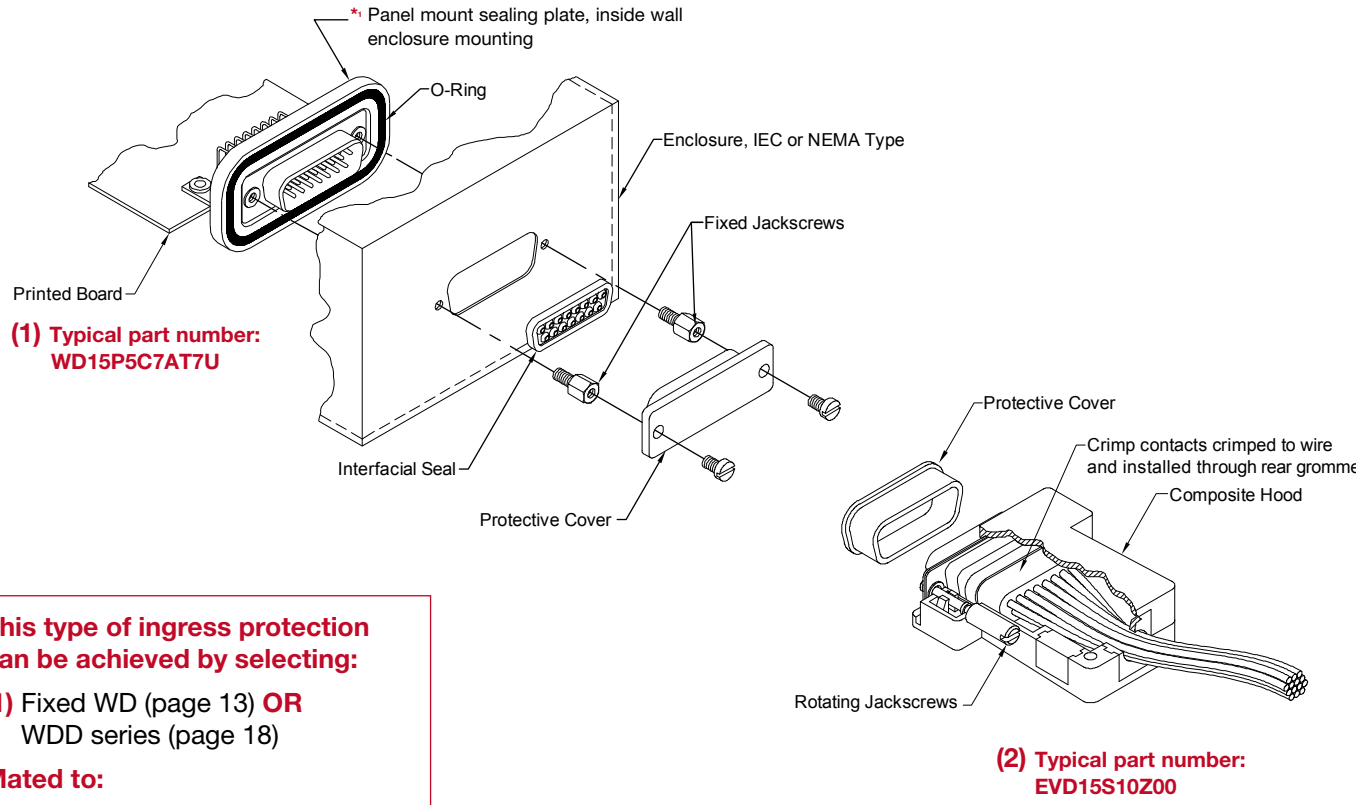
For information regarding IEC 60529 and NEMA 250-1991, see Appendix, page 49.

DIMENSIONS ARE IN INCHES [MILLIMETERS].
ALL DIMENSIONS ARE SUBJECT TO CHANGE.

CONNECTION SYSTEM 2

FIXED ENCLOSURE MOUNTED CONNECTOR MATED TO FREE CABLE CONNECTOR

Provides ingress protection of connector system for continuous electrical operation.



(1) Typical part number: WD15P5C7AT7U

(2) Typical part number: EVD15S10Z00

This type of ingress protection can be achieved by selecting:

(1) Fixed WD (page 13) **OR**
WDD series (page 18)

Mated to:

(2) Free cable EVD series (page 41)

Note:

*1 Outside enclosure wall panel mount sealing plate also available. See Unique Features section, page 46.

SYSTEM 2

System 2 consists of a fixed input/output connector and a compatible free cable connector. The system is normally in operation and may be exposed to dust, splashing water, rain, limited water immersion or hose directed water.

The fixed connector is selected from the connectors offered in System 1. The mating (free or cable) connector must be electrically, mechanically, and chemically compatible with the fixed connector. This requirement enables System 2 to provide the desired **"Corrosion Resistance"** or **"Corrosion Protection"** and maintain the degree of ingress protection IP67 as specified in IEC 60529.

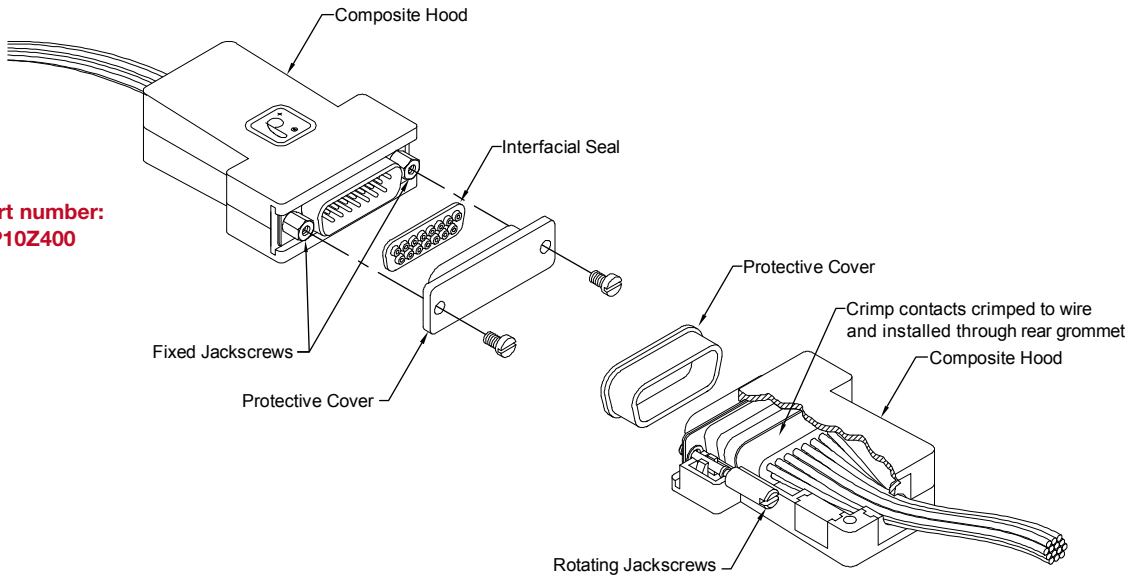
The male connector of System 2 is always equipped with an interfacial seal.

This page is intentionally left blank

CONNECTION SYSTEM 3

FREE CABLE-TO-CABLE CONNECTORS WITH CRIMP REMOVABLE CONTACTS

Provides ingress protection of connector system for continuous electrical operation.



Typical part number:
EVD15P10Z400

Typical part number:
EVD15S10Z00

This type of ingress protection can be achieved by selecting:

Free cable EVD series (page 41)

SYSTEM 3

System 3 is a cable-to-cable interconnection system consisting of two free cable connectors. The system is normally in operation and may be exposed to dust, splashing water, rain, limited water immersion or hose directed water.

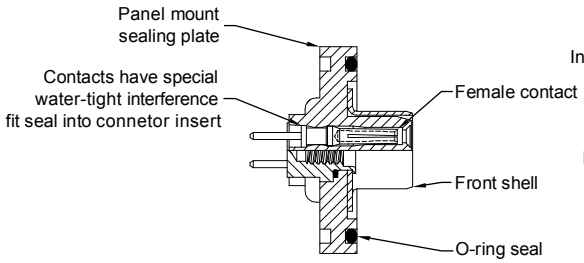
The connectors must be electrically, mechanically, and chemically compatible with each other. This requirement enables System 3 to provide the desired level of **"Corrosion Resistance"** or **"Corrosion Protection"** and maintain the degree of ingress protection IP67 as specified in IEC 60529.

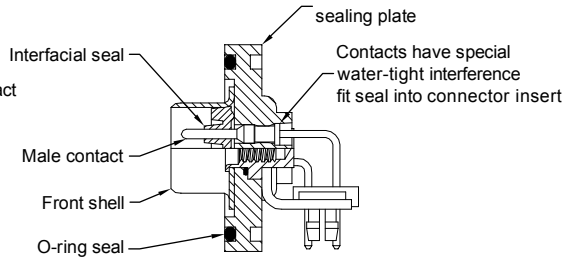
The male connector of System 3 is always equipped with an interfacial seal.

For information regarding IEC 60529 and NEMA 250-1991, see Appendix, page 49.

WD SERIES UNIBODY DESIGN

ENVIRONMENTAL SEALING FEATURES





FEATURES:

- Popular, economical option for applications requiring sealed connectors.
- One piece Unibody connector insert eliminates need for secondary sealing processes.
- Improved temperature range, increased performance, and lower cost.

WD UNIBODY SERIES

IMPROVED UNIBODY DESIGN
PROFESSIONAL QUALITY
STANDARD DENSITY FIXED CONTACTS

- Popular, economical option for applications requiring sealed connectors.
- One piece Unibody connector insert eliminates need for secondary sealing processes.
  See page 6 for details.
- Improved temperature range, increased performance, and lower cost.
- Fixed, size 20 contacts
- Terminations include solder cup, straight and right angle (90°) printed board mount.
- Five connector variants with 9, 15, 25, 37, and 50.
- Corrosion protected and corrosion resistant options.
- A wide variety of options and accessories.

Connectors Conforms to:

- IP 67 per IEC 60529
- IEC 60807-2, Performance Level 2
- UL File # E49351
- CSA File # LR 54219

Telecommunication:

- UL File # E140980

TECHNICAL CHARACTERISTICS

ENVIRONMENTAL CHARACTERISTICS:

WIN-D series connectors mounted on IEC 60529 or NEMA 250-1991 enclosures.

WIN-D Connector Panel mount sealing plates, when mounted on the walls of enclosures, maintain the dust and water ingress protection rating of IEC 60529 or NEMA 250 enclosure on which they are mounted. WIN-D connector enclosure assemblies provide dust and water ingress protection to IP67. Refer to Appendix A for details of IP 67 ratings and NEMA enclosure types 6 and 4X, as well as other IEC and NEMA enclosures having less stringent environmental requirements.

ENVIRONMENTAL TEST SPECIFICATIONS:

Applicable IEC Moisture Tests:

IP65 IEC 60529 Test 14.2.5: Spray nozzle 6.3 mm diameter, delivery rate 12.5 liters per minute, 1 minute duration of connector exposure to spray. When conducting this test on Portable Enclosure Connectors, the protective cover must be securely fastened over the face of the connector. **Requirements:** No water to have penetrated enclosure through connector.

continued on next page. . . .

TECHNICAL CHARACTERISTICS

continued from previous page. . . .

IP67 IEC 60529, Test 14.2.7: Temporary immersion, 1.0 meter for 30 minutes. **Requirements:** No water to have penetrated enclosure through connector.

Applicable IEC Connector Tests After Moisture Conditioning Has Been Performed:

IEC 60512-2, Test 3a: Insulation Resistance
IEC 60512-2, Test 4a: Voltage proof
Requirements: Portable enclosure. 1 G ohm minimum insulation resistance after connector face and contacts are dried. Voltage proof 1,000 V rms.

- It is recommended that connectors be tested in the specific application.
- Service life of connectors cannot be predicted for all applications.

MATERIALS AND FINISHES:

Connector Insert: Nylon resin, UL 94V-0 black color.
Contacts: Precision machined copper alloy.
Contact Plating:
Corrosion Protection: Gold flash over nickel plate.
Corrosion Resistant: Gold plate 0.000030 inch [0.76 µ] over nickel plate.
Shells, Jackscrew Systems and Cul-de-sac Mounting Accessories:
Corrosion Protection: Steel, zinc plated.
Corrosion Resistant: Stainless steel passivated.
Push-on Fasteners: Phosphor bronze with tin plate.
Angle Brackets: Brass, zinc plate.
Interfacial Seal: Thermoplastic Elastomer (TPE), Santoprene™ or equivalent.
Panel Mount Sealing Plate Assembly: Glass filled thermoplastic with elastomer O-ring. Shell size 3, 4, and 5 male connectors contain stainless steel support strip.
Protective Cover Over Connector Shell: Conductive polyethylene or conductive polyester.

MECHANICAL CHARACTERISTICS:

Size 20 Fixed Contacts: Male contact - 0.040 inch [1.02 mm] mating diameter. Female contact – rugged open entry design.
Contact Retention in Insulator: 6 lbs. [27N]
Contact Terminations: Solder cup contacts – 0.042 inch [1.06 mm] minimum hole diameter for 20 AWG [0.5 mm^2] wire maximum.

Straight printed board mount – 0.028 inch [0.71 mm] termination diameter.

Right angle (90°) printed board mount – 0.028 inch [0.71 mm] termination diameter for all printed board contact footprints.

Coding (keying): Trapezoidally shaped shells.
Enclosure Mounting Accessories: Cul-de-sac blind hole fasteners, angle brackets and push-on fasteners.
Inside Wall Enclosure Mount: Minimum thickness 0.040 inch [1.02 mm]. Maximum thickness 0.080 inch [2.03 mm].
Locking Systems: Jackscrews.
Mechanical Operations: 500 operations minimum per IEC 60512-5.
Required Sealing Plate Mounting Torque: 1.75 in-lb. [0.20 Nm] minimum. 2.25 in-lb. [0.25 Nm] maximum.

ELECTRICAL CHARACTERISTICS:

Contact Current Rating: 7.5 amperes nominal,
Initial Contact Resistance: 0.008 ohms maximum.
Insulator Resistance: 5 G ohms.
Clearance and Creepage Distance Minimum: 0.039 inch [1.0mm].
Proof Voltage: 1000 V r.m.s.
Working Voltage: 300 V r.m.s.

CLIMATIC CHARACTERISTICS:

Temperature Range: -40°C to +125°C

WD SERIES

PROFESSIONAL QUALITY
STANDARD DENSITY FIXED CONTACTS

- Popular, economical option for applications requiring sealed connectors.
- Precision sealing process ensures environmental performance. See page 6 for details.
- Fixed, size 20 contacts
- Terminations include solder cup, straight and right angle (90°) printed board mount.
- Five connector variants with 9, 15, 25, 37, and 50 contacts.
  See WD Unibody section (page 11) for variants supplied in Unibody design.
- Corrosion protected and corrosion resistant options.
- A wide variety of options and accessories.

Connectors Conforms to:

- IP 67 per IEC 60529
- IEC 60807-2, performance level 2
- UL File # E49351
- CSA File # LR 54219

Telecommunication:

- UL File # E140980

TECHNICAL CHARACTERISTICS

ENVIRONMENTAL CHARACTERISTICS:

WIN-D series connectors mounted on IEC 60529 or NEMA 250-1991 enclosures for electrical equipment.

WIN-D connector panel mount sealing plates, when mounted on the walls of enclosures, maintain the dust and water ingress protection rating of IEC 60529 or NEMA 250 enclosure on which they are mounted. WIN-D connector enclosure assemblies provide dust and water ingress protection to IP67 which allows temporary immersion in water to a depth of 0.5 meters for 30 minutes without ingress of water or dust to the enclosure. Refer to Appendix A for details of IP67 ratings and NEMA enclosure types 6 and 4X, as well as other IEC and NEMA enclosures having less stringent environmental requirements.

WIN-D series cable connector with cable support WIN-D cable connectors meet all the requirement of IEC 60807-2 Performance Level 2, plus the ingress protection requirement of IP67 thereby maintaining the electrical integrity and the ingress protection level of the connection system.

ENVIRONMENTAL TEST SPECIFICATIONS

Applicable IEC Moisture Tests

IP65 IEC 60529 Test 14.2.5 Spray nozzle 6.3 mm diameter, delivery rate 12.5 liters per minute, 1 minute duration of connector exposure to spray. When conducting this test on System 1 – Portable Enclosure Connectors, the protective cover must be securely fastened over the face of the connector. **Requirements:** No water to have penetrated enclosure through connector.

IP67 IEC 60529 Test 14.2.7 Temporary immersion, 0.5 meters for 30 minutes. **Requirements:** No water to have penetrated enclosure through connector.

TECHNICAL CHARACTERISTICS

. . . . continued from previous page.

Applicable IEC Connector Tests After Moisture Exposure Tests Have Been Performed

IEC 60512-2, Test 3a: Insulation Resistance

IEC 60512-2, Test 4a: Voltage proof

Requirements:

System 1 – Portable enclosure. 1 G ohm minimum insulation resistance after connector face and contacts are dried. Voltage proof 1,000 V rms.

System 2 – Enclosure mounted connector to cable connector. 1 G ohm minimum insulation resistance. 1,000 V rms. Voltage proof.

System 3 – Cable to cable connection systems. 1 G ohm minimum insulation resistance. 1,000 V rms. Voltage proof.

- It is recommended that connectors be tested in the specific application.
- Service life of connectors cannot be predicted for all applications.

MATERIALS AND FINISHES:

Connector Insert: Nylon resin, UL 94V-0 black color.

Contacts: Precision machined copper alloy.

Contact Plating:

Corrosion Protection: Gold flash over nickel plate.

Corrosion Resistant: Gold plate 0.000030 inch [0.76 µ] over nickel plate.

Shells, Jackscrew Systems and Cul-de-sac Mounting Accessories:

Corrosion Protection: Steel, zinc plated.

Corrosion Resistant: Stainless steel passivated.

Push-on Fasteners: Phosphor bronze with tin plate.

Angle Brackets: Brass, zinc plate.

Hoods (Cable supports): Composite.

Interfacial Seal: Thermoplastic Elastomer (TPE), Santoprene™ or equivalent.

Panel Mount Sealing Plate Assembly: Glass filled thermoplastic with elastomer O-ring.

Protective Cover Over Connector Shell: Conductive polyethylene or conductive polyester.

MECHANICAL CHARACTERISTICS:

Size 20 Fixed Contacts: Male contact – 0.040 inch [1.02 mm] mating diameter. Female contact - rugged open entry design.

Contact Retention in Connector insert: 6 lbs. [27N]

Resistance to Solder Iron Heat: 500°F (260°C) for 10 seconds duration per IEC 60512-6.

Contact Terminations: Solder cup contacts – 0.042 inch [1.06 mm] minimum hole diameter for 20 AWG [0.5 mm^2] wire maximum.

Straight printed board mount – 0.028 inch [0.71 mm] termination diameter.

Right angle (90°) printed board mount – 0.028 inch [0.71 mm] termination diameter for all printed board contact footprints.

Coding (keying): Trapezoidally shaped shells.

Enclosure Mounting Accessories: Cul-de-sac blind hole fasteners, angle brackets and push-on fasteners.

Inside Wall Enclosure Mount: Minimum thickness 0.040 inch [1.0 mm]. Maximum thickness 0.080 inch [2.0 mm].

Locking Systems: Jackscrews.

Mechanical Operations: 250 operations minimum per IEC 60512-5 IP67 immersion rated.
500 operations minimum per IEC 60512-5 IP65 spray nozzle rated.

Required Sealing Plate Mounting Torque: 1.75 in-lb. [0.20 Nm] minimum.
2.25 in-lb. [0.25 Nm] maximum.

ELECTRICAL CHARACTERISTICS:

Contact Current Rating: 7.5 amperes nominal.

Initial Contact Resistance: 0.008 ohms maximum.

Insulator Resistance: 5 G ohms.

Clearance and Creepage Distance Minimum: 0.039 inch [1.0mm].

Proof Voltage: 1000 V r.m.s.

Working Voltage: 300 V r.m.s.

CLIMATIC CHARACTERISTICS:

Temperature Range: -25°C to +85°C

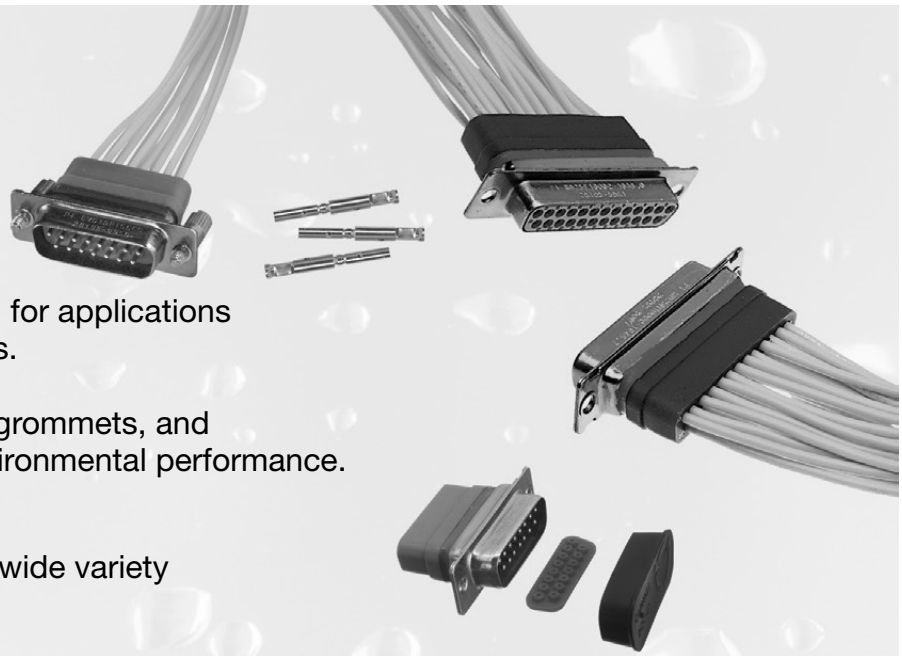
EVD SERIES

MILITARY / INDUSTRIAL QUALITY

FOR MILITARY AND SEVERE INDUSTRIAL ENVIRONMENTAL APPLICATIONS

STANDARD DENSITY REMOVABLE CONTACTS

Authentic Positronic™ PosiBand®
These contacts utilize Positronic™ PosiBand® technology



- Popular, economical option for applications requiring sealed connectors.
- Precision sealing process, grommets, and interfacial seals ensure environmental performance.
  See page 38 for details.
- Materials are resistant to a wide variety of harsh liquids.
- Crimp removable, size 20 contacts
- Five connector variants include 9, 15, 25, 37, and 50 contacts.
- Corrosion protected and corrosion resistant options.
- A wide variety of options and accessories.

Connectors Conforms to:

- IP 67 per IEC 60529
- Performance conforms to applicable requirements of MIL-DTL-24308 and SAE AS39029

TECHNICAL CHARACTERISTICS

ENVIRONMENTAL CHARACTERISTICS:

EVD connectors, having crimp contacts, meet all of the applicable requirements of MIL-DTL-24308 in addition to the requirements shown below:

Test	Requirements
IP67	Temporary immersion, 0.5 meters for 30 minutes. Mated condition. No water to have penetrated enclosure through connector.
Humidity per EIA 364-31 method IV, Method 1002.2, Type II	1) No deterioration of performance. 2) Insulation resistance greater than 100 mega ohms. 3) Withstand a potential of 1000 VAC (rms) without evidence of flashover or breakdown.
Fluid Immersion per ANSI/EIA-364-10 Test Conditions A and D	1) No detrimental damage. 2) Meet mating and unmating requirements of MIL-DTL-24308.
Immersion, 2 hours at a depth of 36 inch [914.4 mm] in mated condition per MIL-STD 810 Method 512.3. Procedure 1.	While Immersed: 1) Insulation resistance greater than 100 mega ohms. 2) Withstand a potential of 1000 VAC (rms) without evidence of flashover or breakdown.

MATERIALS AND FINISHES:

Connector Insert:	Glass-filled DAP per ASTM-D-5948 type SDG-F, UL 94V-0, green color.
Contacts:	Precision machined cooper alloy.
Contact Plating:	**Military performance** - 0.000050 inch [1.27 µ] gold over nickle plate. **Industrial performance** - 0.000030 inch [0.76 µ] gold over nickel.
Shells:	Steel with zinc plate and stainless steel, passivated.

TECHNICAL CHARACTERISTICS

continued from previous page. . . .

Mounting Spacers: Steel or brass, zinc plate.

Jackscrew Systems: Steel with zinc plate; and stainless steel, passivated.

Hoods: Composite.

Grommet and Interfacial Seal: Fluorosilicone Rubber per MIL-DTL-25988.

Bonding Material: Fluorosilicone based sealant/adhesive.

Protective Cover Over Connector Shell: Conductive polyethylene or conductive polyester.

Sealing Plug: Teflon.

MECHANICAL CHARACTERISTICS:

Size 20 Removable Contacts: Install contact to rear face of connector insert and release from rear face of connector insert. Male - 0.040 inch [1.02 mm] diameter. Female - PosiBand closed entry design

Contact Retention in Insulator: 9 lbs. [40 N].

Contact Terminations: Closed barrel crimp, wire sizes 20 AWG [0.5 mm^2] through 24 AWG [0.25 mm^2]; Solder contacts - 0.042 inch [1.06 mm] minimum hole diameter for 20 AWG [0.5 mm^2] through 24 AWG [0.25 mm^2] wire size.

Coding (keying): Trapezoidally shaped shells.

Locking Systems: Jackscrews.

Mechanical Operations: 500 operations minimum per IEC 60512-5.

ELECTRICAL CHARACTERISTICS:

Dry Conditions, Basic Connector Body:

Contact Current Rating, Tested per UL 1977:
18 amperes, 2 contacts energized.
14 amperes, 6 contacts energized.
11 amperes, 15 contacts energized.
10 amperes, 25 contacts energized.
9 amperes, 50 contacts energized.

Visit http://www.connectpositronic.com/connector-details/d-subminiature/environmentally-sealed/technical-specifications/ to view temperature rise curves.

Initial Contact Resistance: 0.004 ohms maximum.

Proof Voltage: 1,000 V r.m.s.

Insulation Resistance: 5 G ohms.

Clearance and Creepage Distance (minimum): 0.039 inch [1.0 mm].

Working Voltage: 300 V r.m.s.

CLIMATIC CHARACTERISTICS:

Temperature Range: -55°C to +125°C.

THERMOCOUPLE CONTACTS:

Size 20 crimp contacts are available, see page 40 for details.

ORDERING INFORMATION - CODE NUMBERING SYSTEM

Specify Complete Connector By Selecting An Option From Step 1 Through 8

STEP	1	2	3	4	5	6	7	8	9	10
EXAMPLE	EVD	25	P	1	0	Z	0	S	/AA	

STEP 1 - BASIC SERIES
EVD Series

STEP 2 - EVD Connector Variants
9, 15, 25, 37, 50

STEP 3 - CONNECTOR GENDER
P - Male with interfacial seal
S - Female - PosiBand closed entry contact design

STEP 4 - Type of Contacts
0 - Contacts ordered separately. See pages 39 & 40 .
1 - Crimp, 20 AWG - 24 AWG [0.5 mm^2 - 0.25 mm^2] kitted with connector.
2 - Solder, 20 AWG - 24 AWG [0.5 mm^2 - 0.25 mm^2] kitted with connector.

*1 STEP 5 - MOUNTING STYLE
0 - Mounting hole, 0.120 [3.05] diameter.
F - Float mounts, universal.
S2 - Swaged spacer, 4-40 threads, 0.125 [3.18] length.
S5 - Swaged locknut, 4-40 threads.

*1 STEP 6 - HOODS
0 - None.
Z - Composite hood with rotating male jackscrews.
Z4 - Composite hood with fixed female jackscrews.

*1 STEP 7 - LOCKING SYSTEMS
0 - None. Use only with 'Z' or 'Z4' (step 6).
T2 - Fixed female jackscrews.
E - Rotating male jackscrews.

STEP 8 - SHELL OPTIONS
*2 S - Stainless steel, passivated.
0 - Zinc plated.

STEP 9 - ENVIRONMENTAL COMPLIANCE OPTIONS
/AA - Compliant per EU Directive 2002/95/EC (RoHS)

NOTE: If compliance to environmental legislation is not required, this step will not be used. Example: EVD25P10Z0S

STEP 10 - SPECIAL OPTIONS
Consult Technical Sales

NOTES:

*1 For additional information listed in Steps 5, 6, and 7, see the Accessories section, page 42.
*2 For stainless steel dimpled male versions, contact Technical Sales.

For information regarding REMOVABLE CONTACTS, see illustration/drawing and charts on pages 39 & 40 .

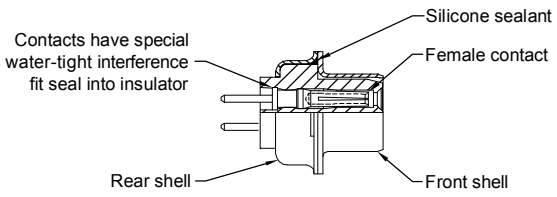
UNIQUE FEATURES

Positronic is **known** around the world **for offering** our customers **flexibility** when choosing connectors.

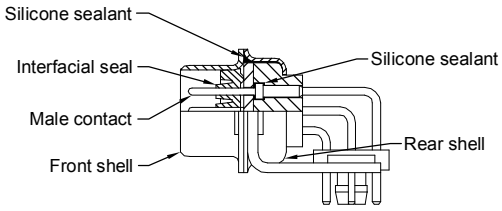
In addition to allowing **customers** to **create** part numbers for **particular applications,** Positronic offers a **wide variety** of features and accessories within our products.

Positronic is also **eager** to modify existing products **to meet unique customer requirements.** If you do not find what you need with this catalog, please contact us for assistance.

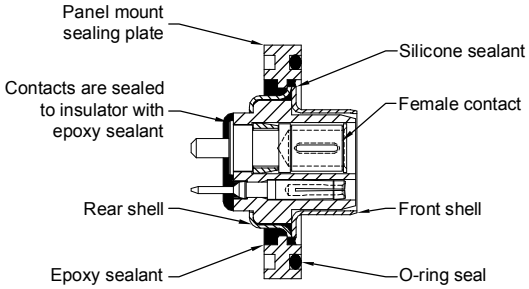
OTHER SEALED D-SUBMINIATURE CONNECTOR OPTIONS



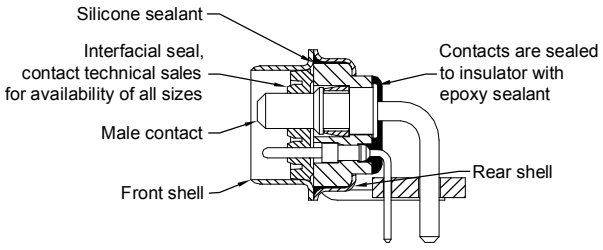
MD STYLE CONNECTOR



ODD STYLE CONNECTOR



COMBO-D STYLE CONNECTOR



COMBO-D STYLE CONNECTOR

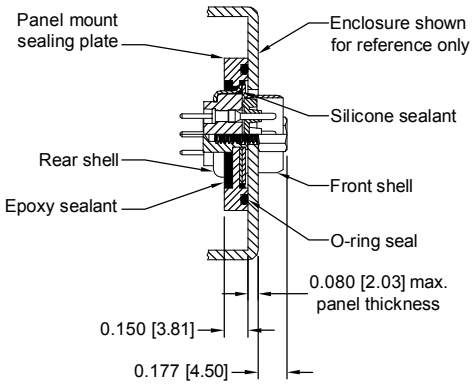
SEALED STANDARD OR HIGH DENSITY D-SUBMINATURE

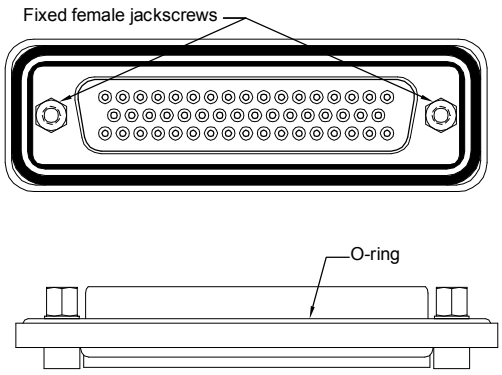
- Available in both standard density and high density connector variants.
- Standard MD or ODD series connectors can be sealed between the connector shell and the connector insert.
- Contact technical sales for more information.

SEALED COMBINATION D-SUBMINATURE

- Could be supplied with mounting plate or without.
- Contact technical sales for more information or additional contact configurations.

MACHINED ALUMINUM MOUNTING PLATE WITH CONDUCTIVE O-RING





MATERIALS AND FINISHES:

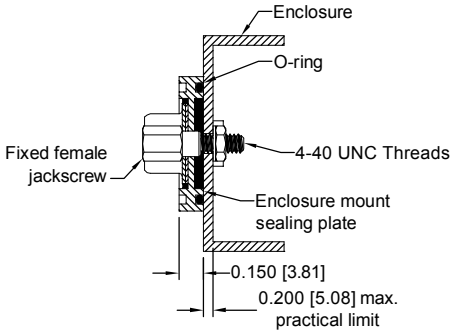
Panel mount sealing plate - Aluminum, chemical conversion coating.

Conductive O-ring - Silver coated thermoplastic elastomer.

CONTACT TECHNICAL SALES FOR MORE INFORMATION

OUTSIDE WALL ENCLOSURE MOUNT

FOR APPLICATIONS REQUIRING SEALED D-SUBMINIATURE CONNECTOR TO BE MOUNTED ON THE OUTSIDE OF THE ENCLOSURE.



Sealing Plate Material: Glass filled thermoplastic

Note: Sealing plate is mounted to enclosure wall with jackscrews torqued to a value of 1.75 in-lb [0.20 Nm] minimum, 2.25 in-lb [0.25 Nm] maximum.

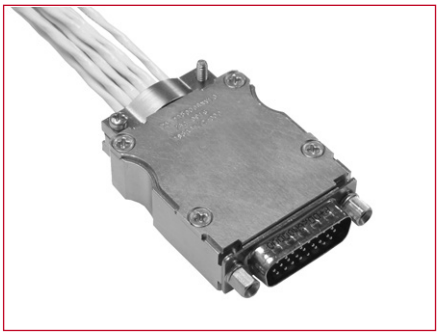
CONTACT TECHNICAL SALES FOR PART NUMBER

LIGHTWEIGHT ALUMINUM HOOD

Positronic now offers a Lightweight Aluminum Hood for use with D-subminiature connectors!

These hoods are offered in the following material and finish combinations:

- Aluminum
- Aluminum with electroless nickel plate
- Aluminum with yellow anodize
- Aluminum, chemical conversion coating, zinc content is 1% maximum



DIMENSIONS ARE IN INCHES [MILLIMETERS].
ALL DIMENSIONS ARE SUBJECT TO CHANGE.

OTHER ENVIRONMENTAL CONNECTOR OFFERINGS

HERMETIC CONNECTORS

Intended for use as an electrical feed through in high vacuum applications • Leakage rate: < $5x10^{-9}$ mbar.l/s under a vacuum $1.5x10^{-2}$ mbar • Signal, power, coax and high voltage versions available • Connectors can be mounted on flange assembly per customer specification

ENVIRONMENTAL CIRCULAR CONNECTORS

Non-corrodible / lightweight composite construction • EMI/RFI shielded versions • Thermocouple contacts • Environmentally sealed versions • Rear insertion / front release of removable contacts • Two level sequential mating • Over molding available on full assemblies

EXPLANATION OF INGRESS PROTECTION (IP) SYSTEM FOR ENCLOSURES

This system outlined in IEC 60529 is designed to indicate the standard degrees of protection: from (a) touch and ingress of solids, and (b) from ingress of liquids, which enclosures may exhibit, and must not be confused with explosion protection techniques. These degrees of protection are, however, frequently referred to in standards and literature, and hence are listed below.

The first numeral designates the degree of protection against touching live parts and ingress of solid foreign bodies, the second designates the degree of protection against ingress of liquid.

The higher the numeral of the first and second characteristic, the greater degree of protection the enclosure offers, e.g. IP55 meets all the less onerous degrees such as IP22, IP23, IP34 and IP54. The term “weatherproof” is not included at present in the IP system but IP54 enclosures are frequently described in this way.

PROTECTION OF EQUIPMENT AGAINST INGRESS OF SOLID BODIES AND LIQUIDS

SOLID FOREIGN BODIES			LIQUIDS	
FIRST CHARACTERISTIC NUMERAL	OBJECT SIZE	DEGREE OF PROTECTION	SECOND CHARACTERISTIC NUMERAL	DEGREE OF PROTECTION
0		No protection of persons against contact with live or moving parts inside the enclosure. No protection of equipment against ingress of solid foreign bodies.	0	No protection.
1	>50 mm	Protection against accidental or inadvertent contact with live or moving parts inside the enclosure by a large surface of the human body, e.g. a hand, but not protection against deliberate access to such parts. Protection against ingress of large solid foreign bodies.	1	Protection against drops of condensed water. Drops of condensed water falling on the enclosure shall have no harmful effect.
2	>12.5 mm	Protection against contact with live or moving parts inside the enclosure by fingers. Protection against ingress of medium size solid foreign bodies.	2	Protection against drops of liquid. Drops of falling liquid shall have no harmful effect when the enclosure is tilted at any angle up to 15° from the vertical.
3	>2.5 mm	Protection against contact with live or moving parts inside the enclosure by tools, wires or such objects of thickness greater than 2.5 mm. Protection against ingress of small solid foreign bodies.	3	Protection against rain. Water falling in rain at an angle equal to or smaller than 60° with respect to the vertical shall have no harmful effect.
4	>1.0 mm	Protection against contact with live or moving parts, inside the enclosure by tools, wires or such objects of thickness greater than 1 mm. Protection against ingress of small solid foreign bodies.	4	Protection against splashing. Liquid splashed from any direction shall have no harmful effect.
5		Complete protection against contact with live or moving parts inside the enclosure. Protection against harmful deposits of dust. The ingress of dust is not totally prevented, but dust cannot enter in an amount sufficient to interfere with satisfactory operation of the equipment enclosed.	5	Protection against water jets. Water projected by a nozzle from any direction under stated conditions shall have no harmful effect.
6		Complete protection against contact with live or moving parts inside the enclosure. Protection against ingress of dust.	6	Protection against conditions on ships’ decks (deck watertight equipment). Water from heavy seas shall not enter the enclosures under prescribed conditions.
			7	Protection against immersion in water. It shall not be possible for water to enter the enclosure under stated conditions of pressure and time.
			8	Protection against indefinite immersion in water under specified pressure. It shall not be possible for water to enter the enclosure.

DESCRIPTION OF NEMA ENCLOSURE TYPES

TYPE	INTENDED USE AND DESCRIPTION
1	Indoor use primarily to provide a degree of protection against limited amounts of falling dirt.
2	Indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt.
3	Outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust and damage from external ice formation.
3R	Outdoor use primarily to provide a degree of protection against rain, sleet and damage from external ice formation.
3S	Outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust and to provide for operation of external mechanisms when ice laden.
4	Indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, hose-directed water and damage from external ice formation.
4X	Indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water and damage from external ice formation.
5	Indoor use primarily to provide a degree of protection against settling airborne dust, falling dirt and dripping noncorrosive liquids.
6	Indoor or outdoor use primarily to provide a degree of protection against hose-directed water and the entry of water during occasional temporary submersion at a limited depth and damage from external ice formation.
6P	Indoor or outdoor use primarily to provide a degree of protection against hose-directed water, the entry of water during prolonged submersion at a limited depth and damage from external ice formation.
12, 12K	Indoor use primarily to provide a degree of protection against circulating dust, falling dust, falling dirt and dripping noncorrosive liquids.
13	Indoor use primarily to provide a degree of protection against dust, spraying of water, oil and noncorrosive coolant.

COMPARISON BETWEEN NEMA ENCLOSURE TYPE NUMBERS AND IEC ENCLOSURE CLASSIFICATION DESIGNATIONS

IEC Publication 60529, Classification of Degrees of Protection Provided by Enclosures, provides a system for specifying the enclosures of electrical equipment of the basis of the degree of protection provided by the enclosure. IEC 60529 does not specify degrees of protection against mechanical damage of equipment, risk of explosions or conditions such as moisture (produced for example by condensation), corrosive vapors, fungus or vermin. NEMA Standards Publication 250 does test for environmental conditions such as corrosion, rust, icing, oil and coolants. For this reason, and because the tests and evaluations for other characteristics are not identical, the IEC Enclosure Classification Designations cannot be exactly equated with NEMA Enclosure Type Numbers.

The IEC designation consists of the letters IP followed by two numerals. The first characteristic numeral indicates the degree of protection provided by the first enclosure with respect to persons and solid foreign objects entering the enclosure. The second characteristic numeral indicates the degree of protection provided by the enclosure with respect to the harmful ingress of water.

The Table provides an approximate equivalent conversion from NEMA Enclosure Type Numbers to IEC Enclosure Classification Designations. The NEMA Types meet or exceed the test requirements for the associated IEC Classifications; for this reason the Table cannot be used to convert exactly from IEC Classifications to NEMA Types.

COMPARISON OF NEMA TYPE NUMBERS TO IEC CLASSIFICATION DESIGNATIONS

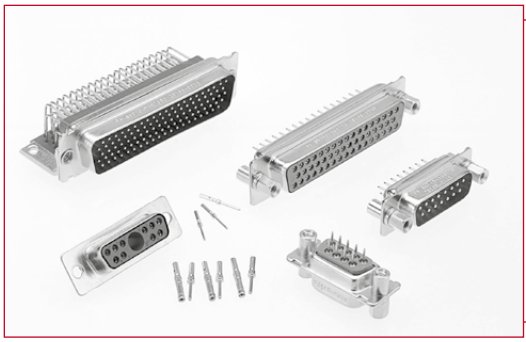
(Cannot be used to convert IEC Classification Designations to NEMA Type Numbers)

NEMA ENCLOSURE TYPE NUMBER	IEC ENCLOSURE CLASSIFICATION DESIGNATION
1	IP10
2	IP11
3	IP54
3r	IP14
3s	IP54
4 and 4x	IP56
5	IP52
6 and 6p	IP67
12 and 12K	IP52
13	IP54

Note: This comparison is based on tests specified in IEC Publication 60529.

OTHER D-SUBMINATURE PRODUCTS

Positronic offers a full line of D-subminiature connectors in a wide variety of contact variants and package sizes with press-fit, solder and cable terminations. All Positronic connector products provide quality, reliability and flexibility.

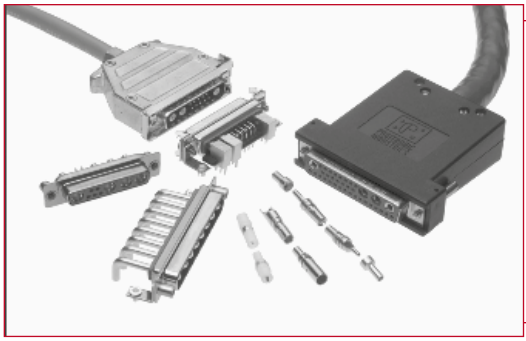


HIGH PERFORMANCE D-SUBMINIATURE CONNECTORS

Standard and high density connectors manufactured to MIL-PRF-24308, Class M; Goddard Space Flight Center S-311-P-4 and Goddard Space Flight Center S-311-P-10.

COMPLIANT PRESS-IN CONNECTORS

Standard and high density connectors
Straight and right angle (90º) printed board mount
Low press-in force eliminates stress on printed circuit board during insertion.



COMBO-D CONNECTORS

Connectors with signal, shielded, power, thermocouple or high voltage contacts in a single package. Power press-fit terminations now available.

DUAL PORT CONNECTORS

Right angle (90º) printed board mount connectors assembled stacked to maximize real estate; contact variants 9 through 62; available in standard density high density, and mixed density.

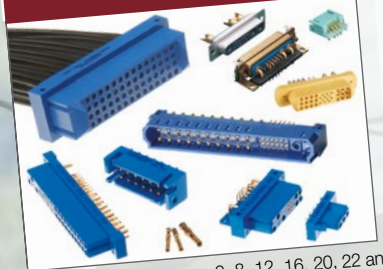
Connector Excellence®

Positronic HIGH RELIABILITY Products

POWER



FEATURES:

- High current density • Energy saving - low contact resistance • Hot swap capability
- AC/DC operation in a single connector
- Signal contacts for hardware management
- Blind mating • Sequential mating
- Large surface area contact mating system
- Wide variety of accessories
- Customer-specified contact arrangements
- Modular tooling which produces a single piece connector insert

Contact Sizes: 0, 8, 12, 16, 20, 22 and 24
Current Ratings: To 200 amperes per contact
Terminations: Crimp and fixed cable connector, straight solder, right angle (90°) solder, straight compliant press-in and right angle (90°) compliant press-in
Configurations: Multiple variants in a variety of package sizes
Compliance: PICMG 2.11, PICMG 3.0, VITA 41, DSCC, GSFC S-311-P-4, GSFC S-311-P-10

D-SUBMINIATURE

FEATURES:

- Four performance levels available for best cost/performance ratio: professional, industrial, military and space-flight quality
- Options include high voltage, coax, thermocouple and air coupling contacts; environmentally sealed and dual port connector packages including mixed density
- Broad selection of accessories
- Size 20 and 22 contacts suitable for use in carrying power
- IP65, IP67

Contact Sizes: 8, 16, 20 and 22
Current Ratings: To 100 amperes
Terminations: Crimp, wire solder, straight solder, right angle (90°) solder, straight compliant press-in and right angle (90°) compliant press-in
Configurations: Multiple variants in both standard and high densities, seven connector housing sizes
Qualifications: MIL-DTL-24308, GSFC S-311-P-4, GSFC S-311-P-10, SAE AS39029, DSCC

RECTANGULAR

FEATURES:

- Two performance levels available: industrial quality and military quality
- A wide variety of accessories
- Broad selection of contact arrangement and package sizes
- Connector coding device (keying) options

Contact Sizes: 16, 20 and 22
Current Ratings: To 13 amperes nominal
Terminations: Crimp, wire solder, straight solder, right angle (90°) solder, and straight compliant press-in
Configurations: Multiple variants in both standard and high densities, thirty package sizes
Qualifications: MIL-DTL-28748, SAE AS39029, CCITT V.35

CIRCULAR

FEATURES:

- Non-corrodible / lightweight composite construction
- EMI/RFI shielded versions
- Thermocouple contacts
- Environmentally sealed versions
- Rear insertion/ front release of removable contacts
- Two level sequential mating
- Overmolding available on full assemblies

Contact Sizes: 12, 16, 20 and 22
Current Ratings: To 25 amperes nominal
Terminations: Crimp, wire solder, straight solder, and right angle (90°) solder
Configurations: Multiple variants in four package sizes
Qualifications: Environmental protection to IP67

CABLE

FEATURES:

- Shorten the supply chain and reduce additional costs and delays by "cablizing" your Positronic connector selection
- Overmolding available
- Shielded and environmentally sealed versions available
- Power cables and access boxes which meet the SAE J2496 specification

- ✔ Design assemblies in accordance with customer specifications.
- ✔ Prepare wire harness connector configuration and performance specifications.
- ✔ Design each system in accordance with applicable customer, domestic, and international standards.
- ✔ Define and conduct performance and verification testing.

HERMETIC

FEATURES:

- Intended for use as an electrical feedthrough in high vacuum applications
- Helium leakage rate at ambient temperature: $< 5x10^{-9}$ mbar.l/s under a vacuum $1.5x10^{-2}$ mbar
- Signal, power, coax and high voltage versions available
- Connectors can be mounted on flange assembly per customer specification

Contact Sizes: 8, 12, 16, 20 and 22
Current Ratings: To 40 amperes nominal
Terminations: Feedthrough is standard; flying leads and board mount available upon request
Configurations: See D-subminiature and circular configurations above
Compliance: Space-D32
